

LESSON PLAN

Name: Lauren Caputo

Date: Tuesday, Oct 1

Cycle Day: 2

GENERAL INFORMATION

Lesson Title & Subject(s): Math

Topic or Unit of Study: Subtracting 2 & 3 digits, D2

INSTRUCTIONAL PLAN

Lesson Objective: Given a set of 2 digit subtraction problems (with regrouping), students will solve them on their whiteboards with 100% accuracy.

Math Intro 8:45 am-9:20 am

- Review Morning Math
- Review previous night's homework
- Have team captains get their white boards and erasers for their groups.
- Smart Board review:
 - Write 2 digit subtraction (with regrouping) equations on the Smart Board, one at a time.
 - Have students solve each equation on their whiteboard and turn it around for me to see as they finish. Once everyone has solved the equation, solve it on the Smart Board to check their answers. For students who solved the problem incorrectly, help them see what their mistakes were.

Math Intro Closing Activity:

Have class recite the subtraction poem all together (More up top? No need to stop! More on the floor? Go next door and borrow 10 more!)

Guided Math 11:00 am-12:00 pm

Station 1 Caputo: Task cards activity

- Materials: Clip board, answer sheet, pencil, dry erase board and marker (for solving each equation)
- Task cards A-O will be taped up around the room. Students will work in pairs to walk around and find task cards. Each student will solve the equation and check to see if their partner got the same answer. If not, they will work to find the mistake. They'll continue until they have solved all 15 problems correctly.

Station 2 Jean: Subtracting with Zeros worksheet, when finished continue Math Mystery packet with a partner.

Station 3 Jean: IXL Math

Closing Activity 12:00-12:03

Assign Subtracting with Zeros worksheet for homework. Write in agendas.
